CAREER OBJECTIVE

Aspiring Software Developer with strong programming skills in Java and Python, hands-on experience in backend development and AI-powered applications. Seeking a Software Developer role to build scalable software solutions, solve real-world problems, and continuously grow as a software engineer.

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, JavaScript, SQL
- **Web Technologies:** HTML, CSS, Django, Streamlit
- **Databases:** MySQL, SQL
- **Developer Tools:** Git, GitHub, VS Code, IntelliJ IDEA, Jupyter Notebook, Table
- **Core Concepts:** Arrays, Strings, OOP, Data Structures & Algorithms,

EXPERIENCE

AI Intern — Infosys Springboard

Remote — Nov 2025 – Jan 2026

- Developed SwiftVisaAI, an AI-powered visa assistance application utilizing Retrieval-Augmented Generation (RAG) to deliver context-aware immigration responses.
- Engineered backend features in Python to process and index policy documents for efficient information retrieval.
- Collaborated with mentors to fine-tune model integration, optimizing retrieval accuracy and overall system performance.

PROJECTS

CareerCraft

Python, FastAPI, React, Google Gemini API, Scikit-Learn, SQLite

- Developed an ATS resume optimization web app using FastAPI and React that parses job descriptions to extract key skills and highlight missing keywords.
- Implemented text matching algorithms using TF-IDF and Cosine Similarity (Scikit-Learn) to compare resume content against job specs and calculate match scores.
- Integrated Google Gemini AI to automatically rewrite experience bullet points with missing keywords, complete with user auth and ATS PDF export capabilities.

College Placement & Job Portal

Python, Django, Django REST Framework, React, SQLite, JWT

- Developed a full-stack campus placement portal using Django REST Framework and React to streamline job postings, applications, and recruitment workflows.
- Implemented Role-Based Access Control (RBAC) to deliver secure, segregated dashboards for Students (job browsing & status tracking) and Admins/HR (job & applicant management).
- Engineered a relational SQLite database schema with real-time status pipelines (Applied → Interviewing → Selected / Rejected) and recruiter filtering by CGPA/department.

EDUCATION

School of Information Technology, RGPV University

Bhopal, Madhya Pradesh

Bachelor of Technology (Artificial Intelligence & Machine Learning) — CGPA: 6.99

2023–2027

Saraswati Shishu Mandir Higher Secondary School

Nowgong, Madhya Pradesh

Class XII (MP Board) — **91%**

2022–2023

Saraswati Shishu Mandir Higher Secondary School

Nowgong, Madhya Pradesh

Class X (MP Board) — **95%**

2020–2021

CERTIFICATIONS

- Infosys Springboard AI Internship
- TCS iON Career Edge – Young Professional
- Java (Basic) – HackerRank
